I. WHAT IS AFRO CAPITAL?

Afro capital is a project born in 2019 and which until then has evolved through fundraising.

In itself, this is a project to create a professional trading room that can allow professional traders of Afro Capital and private traders to interact on the stock market via funds from the company or those from individuals. .

A trading room is a room where market operators intervening in the financial markets are gathered. Usage often designates the trading room by the term front-office. Anglo-Saxon countries and other countries use the term trading-room, or even dealing-room or trading-floor.

The idea is to create an environment that looks like Parisian or London trading rooms in order to professionalize in Africa, this profession which is the trading

AFRO CAPITAL

II. THE PROJECT'S OBJECTIVES:

Speaking of goals, some have already been achieved (1) while others have not (2).

1. OBJECTIVES ACHIEVED:

Since December 2020 Afro Capital has set up its trading room in Togo, a place already equipped with the necessary computer equipment for our trading activities. It is therefore a question of raising the necessary equity capital for the company to launch its activities.

In the current room, three (03) traders' positions have been installed who will be willing to trade in future markets with the order book in the company's account.

Afro Capital has also acquired trading software such as Bookmap, Jigsaw trading.

Thus, future operators selected following a very careful recruitment process will be trained on how to use said software with a view to making them suitable for intervening in the financial markets.

From now on, our goal is to be able to raise in the coming months, a starting capital of at least 10,000 US dollars in the trading account of the company.

2. AFRO CAPITAL'S FUTURE OBJECTIVES:

Afro Capital wants to be a fairly ambitious project through its various objectives such as:

- ❖ Integrate into our team Forex traders, equity traders on financial markets and Cryptocurrency traders. This is to diversify our investments. We will then offer free trading training to people through our professional analysts and trading room traders,

- ❖ Allow trained people to have follow-up via the trading room in order to familiarize themselves with the activities of traders. This will be done on the basis of

- ❖ different modalities. Follow-up, support and advice will then be granted to those concerned,
- ❖ Allowing our shareholders or investors in the project to become real collaborators and financial partners working together for the good dynamism of the company,
- ❖ Create in each country, communities of shareholders or Afro Capital investor clubs supervised by managers, each manager of these investor clubs will be responsible for creating its own rules and afro capital will be responsible for managing its portfolio by mutual agreement each club will control its portfolio, afro capital will not have access to its portfolio but simply access to management,
- ❖ Set up investor clubs in countries whose aim is to promote group or mass investment, with the agreement of the latter it is not an investment which will multiply the sum in 4 times or twice it is not also a question of portfolio management but of creating a lasting partnership with them to build a community that understands the risk of the adventure and finally of building a community of understandable and sustainable investors,
- ❖ Create economic magazines intended to inform customers of market developments, to offer trading modules on paper. The goal is also to focus on the visibility of our services and the company,
- ❖ Create an application hosted by Google Play store for Forex, Cryptocurrency, Stock and Futures trading signals.

III.OUR FUNDRAISING:

Basically at this level it is about the role of fundraising, how much money is needed for the project, how to buy the stocks, the rounds, and what a potential investor earns from the project.

1. FUNDRAISING:

Our fundraising consists of collecting 300,000,000 (three hundred million) CFA francs which will be used for the establishment of the company, materially speaking and for the rest, for the future constituting the initial equity for trading.

With this in mind, the lifting was subdivided into nine (09) different evolutionary rounds.

Based on this, we are looking for funders who are interested in the project. By investing in them, you benefit from units or shares giving the title of shareholder. Thus, at each annual balance sheet of the company, the profits will be shared according to those made by Afro Capital and according to the shares or units held by the investor.

It should be noted that this is in no way a money investment project or a project with promising rates of 100% or other percentage but a project that wants interested funders and resolutely ready to do the journey with us to achieve our goals.

2- PURCHASE OF THE COMPANY'S SHARES / UNITS:

To buy the shares, simply contact a seller who is on the list of sellers by country available on the Afro Capital website.

You also have the ability to make direct purchases on the site instantly.

Several means of purchase are available to you in order to make this accessible to everyone.

Brochures and tutorials will also be developed to indicate the procedure to follow if necessary.

3- THE ROUNDS:

ROUNDS	STATUT
ROUND 1	<i>completed</i>
ROUND 2	Completed
ROUND 3	<i>Completed</i>
ROUND 4	completed
ROUND 5	<i>completed</i>
ROUND 6	completed
ROUND 7	<i>In progress...</i> <i>1 share = 0.09 €</i> <i>11 actions for 1 € or 875 CFA francs</i> <i>End of round 07 May 2021</i>
ROUND 8	<i>Waiting...</i> <i>1 share = 0.12 €</i> <i>End of round 07 August 2021</i>
ROUND 9	<i>Waiting...</i> <i>1 share = 0.15 €</i> <i>End of round November 07, 2021</i>

It should also be noted that a 10% bonus is granted to each investor who has a new investor sponsor on the number of shares purchased by the latter.

4. WHAT THE AFRO CAPITAL INVESTOR WINS:

A person who purchases shares in the project will receive dividends at the end of each year after the company's balance sheet and each dividend will depend on the shares held by the investor taking into account the profits earned by Afro Capital during that year.

We expect to be able to pay out the first dividends by the last quarter of 2022.
